

Information related to the characteristics of the patient population most likely to benefit from biofeedback treatment of hypertension, as well as information on the clinical acceptability, effectiveness, and the extent of use of this technology, is also being sought.

The AHCPR is interested in receiving information which would help in the evaluation or review of the technology as described above. To enable the interested scientific community to evaluate the information included in the assessment, AHCPR will discuss in the assessment only those data and analyses for which a source(s) can be cited. Respondents are therefore encouraged to include with their submissions a written consent permitting AHCPR to cite the sources of the data and comments provided. Otherwise, in accordance with the confidentiality statute governing information collected by AHCPR, 42 U.S.C. 299a-1(c), no information received will be published or disclosed which could identify an individual or entity described in the information, or could identify an entity or individual supplying the information.

Any person or group wishing to provide AHCPR with information relevant to this assessment should do so in writing no later than [insert date 90 days after the date of publication] to the Center for Health Care Technology at the address below.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639-3453.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques for other forms of information technology. Send comments to Wilma Johnson, CDC Reports Clearance Officer,

1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project

1. Prevention Marketing Initiative Community Demonstration Site Project Evaluation—New—The Centers for Disease Control and Prevention, National Center for HIV, STD, and TB Prevention, Division of HIV/AIDS Prevention, Prevention Communication Branch is planning to conduct a survey as part of the evaluation of a five-city HIV prevention demonstration program that is part of the national Prevention Marketing Initiative. The local demonstration program is attempting to integrate community participation into a social marketing process. Community groups in the local sites have chosen to target particular high-risk behaviors and/or their determinants in young people under 25 years of age through a variety of intervention strategies. Decisions about the nature of local interventions are being based on formative research in each geographic area. It is hoped that this demonstration program will result in lowering HIV risk behavior among youth in the target audiences, and also in enhanced collaboration among individuals and organizations in the local communities. To evaluate the effectiveness of the interventions, questionnaire data will be collected from community social marketing group members before and after participation, and surveys of youth in local project areas and comparison areas will be undertaken before and after prevention message campaigns are launched. Baseline surveys are planned for early spring. Total cost to respondents is estimated at \$450,000.

Respondents	No. of respondents	No. of responses/ respondent	Avg. burden/response (in hrs.)	Total burden (in hrs.)
Community social marketing group members and control group	200	2	0.50	200
Young people under 25 years of age in target audience and control group	3,000	2	0.25	1500
Total				1700

Dated: November 22, 1995.
Joseph R. Carter,
Acting Associate Director for Management and Operations, Centers for Disease Control and Prevention (CDC).
